MEM PAD · MEDICAL EXCLUSIVE MATERIAL

Special Nose Pad

New exclusive Medical Exclusive Material (MEM)

The shell of the Nose Pad is made of MEM, a specific compound belonging to the family of TPE (thermoplastic elastomers).

MEM respects Humans and the Environment

It does not contain dangerous or polluting elements:

- NO ozone-depleting or toxic substances;
- NO persistent pollutants;
- NO heavy metals (which affect directly human health);
- NO chlorine, therefore no release of dioxin if incinerated.

MEM is Recyclable

The absence of highly volatile plasticizing elements or other additives allows total recyclability. The optimization of the production process of nose pads and specific national regulations in terms of disposal of optical products could bring to a 100% recyclability of the material.

MEM is an Energy Saver

MEM is lighter than PVC; for the same amount of Pads produced, we can estimate a 25% reduction of plastic consumption. As a result, less energy is consumed during the production process.

MEM is a Medical Grade material

In addition to the other International Regulations, MEM is compliant to the United States Pharmacopeia USP CLASS VI for medical devices. Guaranteeing the best safeguard of consumer's health.

MEM
MEDICAL EXCLUSIVE MATERIAL

**NOT HARMFUL TO THE HEALTH
RESPECTFUL OF THE ENVIRONMENT**

MEM PAD · MEDICAL EXCLUSIVE MATERIAL

Special Nose Pad

BENEFITS

- SKIN FRIENDLY - MEM is a biocompatible material, therefore is safe for the health, even after a prolonged contact with the skin.
- INCREASED COMFORT - Thanks to the smoother surface with a slightly higher grip, MEM Pad gives a more comfortable feeling than the common Nose Pads.
- DURABILITY - MEM Pad is very stable (in hardness, geometrical shape and color) hence it has a much longer lifetime than common Nose Pads.
- APPEARANCE - MEM Pad has a transparent "crystal warm" color and can be easily cleaned daily with water.

THE NOSE PAD

- MEM shell is combined with a polycarbonate insert "C" shape, neutral or personalized;
- If personalized, the Logo can be oriented or not oriented;
- It is available in a full range of shapes, to satisfy 95% of market needs, in click and screw systems;
- The edges of the shell are rounded to ensure a smoother feeling at touch.

FULL COMPLIANCE

MEM is compliant to all International Regulations:

- **REACH** (Regulation (EC) No. 1907/2006 on the Registration, Evaluation, Authorisation and Restriction of Chemicals);
- **CPSIA** (Consumer Product Safety Improvement Act of 2008);
- **PROP. 65** (Safe Drinking Water and Toxic Enforcement Act of 1986 (California) - **BPA Label Free**;
- **Conflict Minerals** (Dodd-Frank Wall Street Reform and Consumer Protection Act, sec. 1502).

MEM already satisfies the RSL (Restricted Substances List) required by the majority of buyers.
